Dear ADA review committee,

I would like to take the opportunity to contribute to the law reform:

- End the legal recognition of gender identity
- Ensure all laws and official records are based on biological sex
- With no exceptions protect women's right to single sex spaces , services and opportunities
- return the word 'woman' and 'biological sex' to the anti discrimination act

Gender fluidity needs to be controlled by psychological, medical and legal professionals at a mature age- and the LGB community (as a sexual orientation) should be separated from identity issues for the safety of the whole community.
