Dear Sir/Madam,

I write to make a submission on this consultation. I ask that you keep my submission anonymous if this is published further.

Here's the main concerns I would ask you to please consider:

1. Replacing sex with gender is problematic because it introduces legal uncertainty and undermines important sex-based rights. It removes protections based on biological reality, which is essential for maintaining fairness and justice in areas such as sports and healthcare. This can lead to adverse consequences for individuals who are affected by these changes.
2. A subjective approach towards vilification is not appropriate because it creates an unpredictable threshold subject to individual interpretation, which can lead to injustice. Additionally, it imposes a lower standard on free speech that is not justified by any proportional benefit it might confer, thus infringing on a fundamental right.

Thank you very much for considering this submission.

Kindest regards,
